

## Note：

1．Typical foundation drawing suitable for standard soil condition．
2．Parameters considered in RCC foundation design ：
Load bearing capacity of soil（LBC）
$10 \mathrm{Mt} / \mathrm{m}^{2}$（Minimum）
$50 \mathrm{~m} / \mathrm{s}$
$: \mathrm{Fe} 415$
$: 4.6$

3．Height of foundation above ground level $(150 \mathrm{~mm})$ may be revised to suit the site conditions especially considering the expected water level stagnation．

4．Template supplied is suggested to be used for locating the CC of foundation bolts．
5． 4 Nos．of foundation bolts have to be oriented（located），while casting the foundation such that the door of the electrical junction box faces the required direction．

6．PVC／Gl pipe for entry of supply cable and the materials required for foundation are not scope of our supply．

| 03. | CABLE ENTRY HOLE REVISED | $03-02-18$ | BASKAR |  |  |
