K-LITE illuminates the future with innovative led architectural lighting series

K-LITE INDUSTRIES brightens the path to the future, blending innovation with a legacy of three decades to create architectural lighting solutions that redefine brilliance in every space.

Solutions, characterised by its contemporary design that seamlessly combines timelessness with uniqueness. This luminaire stands out for its compactness, lack of visible mounting equipment and ensuring optimised integration. Aligned with the geometric lines of square columns, the Polar Lighting series is tailor-made for the surroundings of contemporary architectural constructions. K-LITE goes a step further by offering a range of optical options for lighting distribution and correlated colour temperature (CCT), allowing customers to choose between cool white, neutral white, or warm white to suit their requirements.

K-LITE INDUSTRIES, an ISO-certified company renowned for its excellence in manufacturing indoor and outdoor luminaires, has recently unveiled an impressive addition to its product lineup a new series of LED Architectural Lighting. Positioned as a trendsetter in outdoor lighting and driven by the spirit of the "Make in India" initiative, K-LITE has harnessed its innovative prowess to introduce a diverse range of products under Architectural Lighting. This comprehensive series encompasses a wide array of applications, including facade lighting, pathway lighting, in-ground luminaires, up-down lighting,

billboard lighting, vertical light bars, wall washers, area lighting poles, and the sleek and popular polar lighting solutions.

Innovation and expertise

Backed by an extensive understanding of illumination in urban spaces and a rich experience spanning three decades, K-LITE's new Architectural Lighting series is designed to deliver cutting-edge technology tailored to Indian conditions. The fixtures boast a commitment to quality, with LEDs that adhere to LM 80 testing requirements sourced from internationally reputed manufacturers such as Nichia and CREE. The luminaires proudly carry RoHS, LM 79, and CE certifications, showcasing compliance with international standards. Impressively, the luminaire efficacy, measured in lumens per watt, surpasses 100 for all products, underscoring their energy-efficient design.

K-LITE's commitment to excellence and innovation shines brightly in its latest LED Architectural Lighting series. As the company continues to lead the way in outdoor lighting solutions, this new lineup showcases technological advancements and underlines the importance of aesthetic integration in urban environments. With certifications, quality components, and a dedication to energy efficiency, K-LITE's Architectural Lighting series stands as a beacon of illumination, poised to shape the future of outdoor lighting solutions in India and beyond.

Optical precision and customisation
One of the standout offerings in this series is the Sleek Polar Lighting
